DIARY NOTES

A-DD/S

10 March 1966

- 25X1A
1. After the Director's Meeting, I met with Col. White and agreed that, **a**, in addition to stopping printing orders for separate letterheads, **that** we would speak to the chiefs of support in DD/I and DD/S&T and advise them quietly of the Director's views on using only one Agency letterhead. Col. White agreed that we could continue to participate in the intelligence course at [REDACTED] for one more year, but that we should advise them of our intent to disassociate ourselves, at least insofar as furnishing instructors is concerned. **c**. I handed Col. White an EYES ONLY addendum to our report on areas where we may be sensitive should external investigators take a crack at the Agency. A copy of this EYES ONLY addendum is attached.

3. I asked [REDACTED] to arrange for a construction report to be included in the Director's Meeting Book. I cautioned him against letting RE&CD provide more information than we really want, but to identify those projects on which the DD/S should have current information.

25X1A

5. In the Policy and Planning Staff, Office of Finance briefing today, it became abundantly clear that Finance is still touchy about commuted travel and they are not particularly happy about the mailing of checks unless it is to be more universal than we are led to believe Col. White thinks it should be. Col. White, I understand, believes that it ought to be strictly optional.

6. I advised [REDACTED] of your desire that he be a DD/S representative and not merely a Medical Office representative and while he would not be expected to answer technical questions from other support officers he could surely listen. I also asked him to take a critical look at the future of [REDACTED] with regard to support and to make himself available to the Gardner HEW group going to Saigon if he could serve them in any way.

25X1A

7. Nicholas Oganovich, Executive Director, Civil Service Commission, Mr. Rosen, Deputy Executive Director, Civil Service Commission, Commissioner Andolsek and Commissioner Hampton came out to lunch today and were given a very complete and smooth briefing by Col. White on the Agency's activities and programs. They seemed quite grateful. I do not know exactly what was behind this. The briefing included the Vu-Graphs on the Agency's programs and the OTR film [REDACTED]. In any case, it was an excellent performance.
